the Racing Team

### *Grey Eye Management*

Info page company for  
USA Venture Capital firm,  
looking to expand  
opportunities in Poland

## PROFILE

I'm a Senior Front-End Developer with 16 years of experience. Educated and always fascinated with IT. Currently working as a Senior Web Technical Consultant and technical lead for Squiz Ltd's largest global client account, William Hill.

In addition to ongoing maintenance and development of complex systems, supporting live betting (both sports and gaming) pages, I provide ongoing training and development for Will Hill's in-house technical teams.

As an alumni of Technical University I've been always close to the programming, going through languages, from C, C++, C# or declarative Prolog for AI to working with Java Script various libraries. Right now I am looking forward to learning Gatsby and working with Gatsby. In the past I was considered as a CSS ninja.

## PROFESSIONAL EXPERIENCE

### SQUIZ / Senior Front-End Developer / Web Technical Consultant MAY 2014 - PRESENT

Senior Technical Lead for the dedicated team supporting global client William Hill Group ([williamhill.com](http://williamhill.com)).

- Maintenance of US, UK and International environments (Sports and Gaming)
- Planning and applying the architecture, solutions and new features
- Looking after the data flow between the 3rd party data providers, FunnelBack search system and Content Editor Interface (CEI) in Squiz Matrix
- Development of functionalities within the CEI
- Looking after performance of the systems due to the caching layers and data stack, configuration of JMS AMQ for PDS and FunnelBack for sufficient data flow and consistency
- Keeping the relationships with key stakeholders within William Hill Group
- Being point of escalation and troubleshooter for support teams
- Training William Hill teams in terms of efficient Squiz Matrix implementations

Example projects:

- Content Editor Interface - CMS: Development / Configuration of the internal systems and micro-services to allow WH users to access and user-friendly Content Edit Interface. (Matrix, Funnelback, JS (ES 5&6), jQuery, Handlebars, REST, React, Preact, Vue)
- Virtual World micro-service: application that allows users to bet on Virtual Sports and watch the event (Angular JS)
- BetSlip: Betting shopping cart 'Basket for the bets' (Matrix, Angular JS, Karma and Jasmine for testing)
- Scoreboards: Micro-services to watch the Live scoreboards (Matrix, AngularJS and Diffusion)
- Top Bets module app (Matrix, AngularJS)
- eKonik - [trafonline.pl](http://trafonline.pl) - Horse Racing Betting system for Totalizator Sportowy (React, Typescript)
